

IMPORTANT_PLEASE_READ_BEFORRE_UPDATE !

1.) Attention:

The ending of the Image-Data changes from “.bin” to “.bin1” as of version Vxx_06a.

This was necessary because a further bootloader was needed.

However this bootloader is only implemented as of version Vxx_05b.

Therefore to be able to update version Vxx_06a and higher, the version Vxx_05b must be installed first.

2.) Attention:

We strongly recommend to use the supplied mini USB stick for the update!
